Aquatic Animal Use Only - Do Not Contain Antibiotics

SR BIO AQUA PRODUCTS

SR BIO AQUA PRODUCTS

MFG Address :
Ground Floor, PLOT NO.168, Ida Prashanthi Nagar,Kukatpally,
Medchal Malkajgiri, Hyderabad - 500037

Sales Office Address :
Balaji Nagar, Railway Station Road,
Near Surya Chandra Complex, Near Balaji Pride, Velpur - 534222,
Tanuku (M),West Godavari District.
Contact : 9959713456
sales@srbioaquaproducts.com

SR MINWIN is unique formulation which provides essential macro and trace minerals in chelated form that are absorbed by the digestive system of Shrimp. In addition it contains vitamins and specially selected probiotics, which help for better digestion, growth performance and quality yield. Minerals have many physiological functions to maintain acid–base balance and are important in osmoregulation. Among major minerals, calcium (Ca) and magnesium (Mg) are considered to be very important for molting and new shell formation. Some minerals are required in considerable quantities and termed Macro-elements while others which are required in lesser amounts are referred to as Micro-elements (Trace Minerals). The micro elements (Trace Minerals) have a greater role in shrimp nutrition along with other minerals f or healthy shrimp/fish body and better production.

Composition:

INGREDIENTS	QTY PER KG	INGREDIENT	QTY PER KG
PHOSPHORUS	12%	ALUMINIUM	Traces
CALCIUM	24%	MYLYBDINUM	Traces
ZINC SULPHATE	10 grams	COBALT	Traces
MAGNESIUM	40 grams	SILINIUM	Traces
FERROUS SULPHATE	10 grams	SODIUM BUTYRATE	540 grams
MANGANESE SULPHATE	5.0 grams	CHOLINE CHLORIDE	5.0 grams
COPPER SULPHATE	10 grams	L-LYSINE	5.0 grams
COBAL SULPHATE	1.0 grams	DL-METHIONINE	1.0 gram
POTTASIUM	5.0 grams	VITAMINS	100 mg
ZINC SULPHATE	10 grams	PROBIOTICS	50 grams

Main benefits:

Helps moulting process & shell formation in shrimp.
Improve metabolism.
Promotes plankton Development.
Protects from all shell & muscle related problems.
Probiotics and Vitamins will increase resistance & improve immunity.
Protects against mineral deficiency diseases.

Dosage:

20kgs/Ha (or) 10 kgs/Acre (or) as directed by the Aqua consultant.

Storage : Store in cool & dry place. Avoid direct sunlight.
Presentation : 10 kg bag.

AQUA PROBY+
(Soil and water probiotic)

AQUA PROBY+ is the complete probiotic (multi-species approach) product for Aquaculture pond.The effectiveness and synergy of these strains has been proven in years of trials and production application. The uniqueness of AQUA PROBY+ ensure the highest possible numbers of bacteria survive in longer period through the hostile conditions of the animal.

AQUA PROBY+ does not use as a sanitizer/disinfection of the Aquaculture pond.

Composition:

Bacillus subtilis, Bacillus megaterium, Bacillus pumilis, Bacillus polymixa Bacillus licheniformis, ParacoccusPantotrophus, Cellulomonas cartae Thiobacillus ferrooxidans, Thiobacillus thiooxidans, Lactic acid bacillus Nitrosomonas, Nitrobacter, Pseudomonas denitrificans, Rhodococcus, Rhodobacter, Aspergillus niger, Saccharomyces scerevisiae

Average bacterial count: 12 Billion cfu/gram

Main benefits:

1. Increases overall productivity
2. Improves survival
3. Inhibits pathogens
4. Helps in reducing toxic metabolites i.e., ammonia, nitrite,nitrate and hydrogen sulphide
5. Reduce organic matter in pond environments
6. Decrease F.C.R and improves survival
7. Optimizes Phytoplankton
8. Degrades sludge
9. Promotes diseases resistance through immunomodulation

Dosage: 250 / Acre (or) as directed by the Aqua consultant

Prevention: Use every week throughout the culture period

For fermentation: 250 g along with 10 g of rice branand 2 kgof jaggery

Storage : Store in cool & dry place. Avoid direct sunlight.

Presentation: 500 g POUCH

Oxy Tab & Oxy Granules:

Oxygen is liberated in water (in aqua culture ponds) mainly by phytoplankton. During day time phytoplankton liberates oxygen and consumes Carbon-di-oxide through photosynthesis In general, oxygen levels in aquaculture pond should be 5-6 ppm. But during the night time the oxygen levels comes down to 3-4 ppm. When there is a heavy biomass and cloudy weather oxygen levels will go down to as low as 2 ppm resulting in mass mortalities. O2 Tablets is a compound which immediately increases the oxygen levels in the pond thus preventing the mass mortalities Tablets increases the DO levels in the pond water

Benifits:

Oxy Tab with its oxidizing capacity converts toxic substances into non-toxic substances
Oxy Tab Tablets increases growth rate Oxy Tab Tablets increases the survival rate
Oxy TabTablets reaches pond bottom and releases oxygen for a longer period

Composition:

Sodium per carbonate (Active releasing of oxygen with minimum of 13.5%activity)

Dosage:

Moulting period : 1-2 kg/acre at 1 meter water depth Do depletion time: 2-3 kg/acre at 1 meter water depth (or) as advised by aquaculture consultant

storage : store in cool & dry place. avoid direct sun light

Presentation: Available in 10 kg.

ZEOLITE Gold Plus (Granules & Powder)

Zeolites are microporous Crstallinehydrated aluminosilicates, found naturally.

Zeolite granules acts Ion+ exchange capacity obsorption – description probe, Natural and Rich source of minerals. Granulated geolite directly reach pond bottom.

Benefits :-

Adsorbing toxic gases and Regulating ph level of pond water.
For removing Ammonia from Tanks.
Eliminates bad smell, improve water quality.
Promotes Good plankton and improve D.O levels

Composition :- Silicon Dioxide (Sio2): 65-70%, Aluminium :20%, Iron (Fe): 1-2%, Sodium:1-3%, Potassium: 0.5-1%, LOI: 5-8%

Dosage :- 10 kg per Acre or Advised by your Aqua consultant.

Presentation :-10 kg Bag.
